Minisoft Announces Partnership with CISTECH

Eminent MAPICS Consultant Enlists Minisoft's eFORMz for Infor XA Users' Forms Automation Needs

SNOHOMISH, Wash. —October 12, 2011—Minisoft Inc., a leading provider of document management solutions, announced today that it has partnered with CISTECH, the largest full service consulting company dedicated to MAPICS, to provide Minisoft's eFORMz to Infor ERP XA users.

In the course of consulting within the MAPICS community, CISTECH has found that their customers are seeking more sustainable document management programs. Minisoft's eFORMz extends the standard output of Infor ERP applications to help customers automate their entire document management process, eliminating unnecessary costs associated with pre-printed forms.

With eFORMz, CISTECH customers can format and personalize any standard XA print stream or spool file to create attractive, functional and efficient documents that can be distributed via print, fax, email and the web, or stored in a digital archive for later retrieval. In addition, eFORMz can populate forms directly from the company's databases.

CISTECH customers can use eFORMz to produce purchase orders, shipping labels, barcodes, bills of lading, analysis reports, checks, invoices, and more, and incorporate logos and other customized graphics for a pre-built, out-of-the-box experience.
