Automated
multicarrier shipping

Touch Manifest[®]

Universal ship station
interface

Shipping Execution Platform

Seller Marketplace Connectivity

ShipFX features online seller marketplace connectors for retailers drop shipping for Amazon Prime, Walmart Marketplace, Walmart DSV, eBay, Overstock, Wayfair, Rakuten, Pricefalls, Groupon, Newegg and more.

Ship Smarter. Sell More.

Eliminate traditional ship stations and multiple logins. Use ShipFX to set up an automated shipment process based on business rules you define for shipping packages. ShipFX communicates directly to the carrier through API calls to retrieve the appropriate shipping label. ShipFX includes support for a variety of popular carriers including FedEx, UPS, USPS, DHL, Canada Post, EasyPost, OnTrac, Newgistics and more.

⚡ Supercharge shipping ⚡

Deploy on premise
or in the cloud

ShipFX[®]

Support any fulfillment workflow and shipment processing

Automated Shipment Processing

Use ShipFX to automatically ship orders without the need for traditional shipping stations. If you have your packages' weights and dimensions, ShipFX can process your orders based on business rules you set up to decide which carrier to use for a particular shipment.

Touch Manifest[®]

Extends ShipFX functionality to support attended ship station applications

Universal Shipment Interface

Easily access all your shipping carriers from a single user interface. Get real-time carrier rates to find the optimum way to ship your outgoing packages. Avoid failed deliveries using TouchManifest's global address validation. Improve the customer experience by including hassle-free return labels with each shipment.

Seller Marketplace CONNECTIVITY

Online seller marketplace connectors to support dropshipping

Online Seller Marketplace Connectivity

Use ShipFX to automate order fulfillment with your marketplace partners. All ecommerce orders are captured through API calls and imported directly into your WMS, ERP or order management systems. ShipFX can update the marketplace seller with order tracking information and real-time inventory availability.
